COMPUTER STUDIES

GENERAL OBJECTIVES

The aim of the Unified Tertiary Matriculation Examination syllabus in Computer Studies is to prepare the candidates for the Board's examination. The objectives of the syllabus are designed to test candidates' understanding, knowledge and acquisition of:

- 1. Evolution of Computing Systems
- 2. Basic concepts of computer and its operations
- 3. Problem solving skills, data processing and practical skills in Computing
- 4. System software and Application Software.
- 5. Operations of Basic computer hardware Input, Output, Memory and Central Processing Unit
- 6. Application of Online resources and Online skills
- 7. Ethics and human issues in computing
- 8. Career Prospects in Computing

The syllabus is divided into nine sections as given below:

- A. Evolution of Computing
- B. Fundamentals of Computing
- C. Computer Application Packages
- D. Managing Computer Files
- E. Computer Maintenance and Safety Measures
- F. Information & Communication Technology (ICT)
- G. Developing Problem-Solving Skills
- H. Artificial Intelligence (AI) and Robotics
- I. Computer Ethics and Human Issues

DETAILED SYLLABUS

SECTION A: Evolution of Computing

TOPICS/CONTENTS/N	OTES OBJECTIVES
1. History of computing	Candidates should be able to:
 a. Pre-Computing Age Features and composition computing devices b. Computing Devices - 2 c. The history behind each 	onents early beginning of counting/computing - Abacus - Slide Rule h Century - Pascal Calculator

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 ii. Discuss the contributions and uses of each of the founders of these devices: ENIAC EDVAC UNIVAC 1 Desktop Personal Computers, etc
2. Classification of computing devices	Candidates should be able to:
 a. By Generation b. By Size c. By Purpose d. By Type 	 i. Relate each generation with its characteristic feature. First, Second, Third, Fourth to current generation. ii. Describe each generation under the following: Year of Development Basic components/Type of Technology Speed of operation Storage Capacity/Component iii. Explain the differences in the classification of computing systems by size (micro, mini, mainframe, and super) iv. Differentiate among the various types of modern computer systems in respect of sizes and basic components, data and usage Personal Computers Desktops Laptops Tablets Hand-held Servers Workstations Mainframes Wearable Super Computers. Digital Analog Hybrid Special purpose General purpose etc.
	v. State the importance and use of these computing systems

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Overview of Computing Systems	Candidates should be able to:
a. Two main constituents of a computer (hardware and software)	i. Define Computer system in relation to its nature and programmabilityii. List functional parts of computer systems
b. Characteristics of computers	iii. Explain the characteristics of computers (Electronic, Accuracy, Speed, interactive, Delicities Consistence Lange Statement (2019)
c. Type, examples and uses of computer hardware	Reliability, Consistency, Large Storage etc.) iv. Identify the differences between hardware and software
d. Logic Circuits	
 d. Lögie Cheuns e. Types, examples and uses of software 	 Candidates should be able to: Define and give examples of hardware devices List components of computer hardware, their functions and different types -Central Processing Unit, Peripherals (Input and Output devices) and Storage media Explain the differences between input and output devices Explain the functions of major input devices and give examples of the major input devices (keyboards, mouse, scanner, joystick, light pen, voice, digital camera, etc.) Explain the classification of keys on the keyboard (function, numeric, alphabetic, cursors. Explain the features, functions and operations of the mouse Vii Explain the differences among keyboard, mouse, light pen and scanner, digital camera and output devices Viii. Define and give examples of output devices (monitor, printer, speaker, plotters) List the different types, features among set of each output device above. x. Explain the functions of CPU – Arithmetic and Logic Unit (ALU), Control Unit (CU) and Registers. xiii. Explain the functions of ALU, CU and Registers. xiii. Distinguish between Primary and Secondary Memory (Storage) units
	Memory (ROM)) xv. Explain the uses and differences between RAM and ROM

SECTION B: Fundamentals of Computing

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 xvi. Explain the functions of secondary (auxiliary) storages xvii. List different types of secondary storages (Floppy disks, magnetic tape, hard disks, compact disk (CD), Digital Video Disk (DVD),USB, etc.) xix. Carry out comparative analysis of auxiliary storage devices in respect of size, speed, cost and technology (access mode, component, etc.). xx. List different units by which storage are measured and their relationships - bits, bytes, nibbles, words, kilobytes, megabytes, gigabytes, terabytes etc. xxi. Relate the relationships between Micro, Mega, Giga, and Terra bytes. Candidates should be able to: i. Define Registers Bus Address ii. Explain the functions of the following Registers: MDR (Memory Data Register)) MAR (Memory Address Register) AC (Accumulator) PC (Program Counter). CIR (Current Instruction Register), etc. iii. Explain the differences between register and main memory iv. State the major steps involved in how a computer converts data to required information (Input – Process – Output) v. Enumerate factors affecting speed of data transfer (bus speed and bus width) Candidates should be able to: i. Define different type types and uses of gates: AND, NOT, OR, NOR, NAND ii. List the symbols of AND, NOT and OR gates iii. List the symbols of AND, NOT and OR gates iv. Construct a simple comparator with XOR (Exclusive OR) and NOR gate

TOPICS/CONTENTS/NOTES	OBJECTIVES
	Candidates should be able to:
	i. Differentiate between system and application software.
	 ii. List different types of System software (Operating Systems, Utility Software, Middleware, Device Drivers, Translators, etc.) iii. Define Operating System (OS) iv. List functions of OS v. List different types of OS User Interfaces (Text (Command Line and Menu) and Graphical User Interface (GUI)) vi. Give examples of Operating Systems (MS Windows, LINUX, UNIX, etc.) vii. Discuss different OS on phones, iPad (Android, Blackberry, iPhone, etc.) viii. Define Utility Software ix. List functions of Utility Software xi. Give examples of Utility Software xi. Give examples of Utility Software xii. Define Translators xiii. Explain the functions of Translator Software xiv. List the different categories of translators (Interpreter, Assembler and Compiler) xv. Explain the differences among the categories of translators.
	Candidates should be able to:
	 i. List examples of application software and their usage ii. Differentiate between open source and proprietary software iii. Different methods of acquiring Application software (Built in house and Off the Shelf) iv. Explain the differences between User Application program and general-purpose Application packages v. Give examples of common off the Shelf Application packages and their examples. Word Processing (MS Word) Spreadsheet (Excel) Database (Access) Presentation (PowerPoint) Graphics (Adobe Photoshop) Accounting (Sage) Payroll (Sage) Government (Remita) Banking (Fusion Banking Essence) Statistics (SPSS) Educational (SchoolShell)

TOPICS/CONTENTS/NOTES	OBJECTIVES
2. Data and Information	Candidates should be able to:
a. Differences between Data and Information	i. Define data and informationii. List properties of information
b. Data representation.	Candidates should be able to:
c. Methods of Digitisation	 i. List different types of data types (integers, real numbers, strings, multimedia (image, audio/visual, signal etc.) ii. Identify ways of representing and handling data, that is number bases with special reference to binary, decimal, hexadecimal etc. Candidates should be able to: Define digitization Explain the process of digitalization(manual, heads-up, interactive tracing, automatic) List different formats of digitized data (image, audio, video, motion, text, multimedia, etc.)

SECTION C: Computer Application Packages

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Word Processing package	Candidates should be able to:
	(a) General concept	i. Define word processing, and give examples of word processing packages. (MS Word,
	(b) Creating and saving documents	WordStar, WordPerfect, Open Word, etc.,) ii. Identify features of Word Processing packages
	(c) Editing, formatting and insertion	in general (create, save, edit, insert, print, share etc.)
	(d) Printing	iii. List the application areas of Word Processing
	(e) MS Word	packages (Office, Publishing, Journalism, Education, etc.)
	i. Features	Candidates should be able to:
	ii. Launch MS Word	i. Launch effectively MS word.ii. Perform MS Word basic operations
	iii. Basic operations	 create, edit, save, retrieve, print, copy and move, etc.
	iv. Other operations	iii. Use different types and sizes of fontsiv. Perform MS Word operations of:
		 v. Format, justify, search/explore, etc. Carry out spell checking and file merging operations
		vi. Close MS Word.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
	 2. Spreadsheet package (a) General concept (b) Creating and saving documents 	 Candidates should be able to: i. Define Spreadsheet and give examples of Spreadsheet packages. (MS Excel, VisiCalc SuperCalc, SPSS, Calc etc.) ii. Identify features of Spreadsheet packages in general (Environment, Status bar, menu bar, formula bar, etc.) iii. List the application areas of Spreadsheet packages (Accounting, Engineering, Statistics, Calculation, what- if -scenarios, Education, etc.) Candidates should be able to: i. Launch effectively MS Excel. ii. Define basic terms in MS Excel -worksheet, workbook, cells, cell ranges, etc. iii. Use MS Excel to: create, edit, save, retrieve, and print spreadsheet documents. iv. Use data types in MS Excel (Number, Labels, Formula etc.) v. Perform basic operations in MS excel -Data Entry, Saving, Retrieve, move, copy, etc.) vi. Use different types and sizes of fonts viii. Perform additional MS Excel operations (Formatting, Editing, Printing, Drawing charts etc.) ix. Close MS Excel.
	 (c) Editing, formatting and insertion (d) Printing (e) MS Excel i. Features ii. Launch MS Excel iii. Basic operations iv. Other operations 	
3.	Database package	Candidates should be able to: i. Define Database and give examples of
	Definition of Database and examples of database packages	Database packages. (Dbase, Foxbase, MS Access, Oracle, etc.) ii. Define basic database terms (File, Record,
	Database organizations	 Field, key, form, table, etc.) iii. List and explain different types of database organisation (Hierarchical, Network and Relational.) iv. List the application areas of Database in different organizations (Office, Home, Education, Government, Hospital, Agriculture, etc.)
(d)	Different features of database format Basic operations of Database using MS Access	
(e) (f)	Create database using MS Access Carry out operations on existing database using MS Access.	

TOPICS/CONTENTS/NOTES	OBJECTIVES
 4. Graphics Package (a) Definitions and examples of Graphic packages (b) Features of CorelDraw (c) Simple design using CorelDraw 	 Candidates should be able to: Explain different features of database format in MS Access: Files designed as tables Tables comprising of rows and columns Row containing related information about a record Column containing specific type of information about a field Carry out steps to create a database in MS Access to: Define structure of a database Indicate field type (numeric, character, data, text, etc.) Enter data Save data carry out basic operations on an already created MS Access database: searching, modifying, sorting, reporting, selecting, inserting, etc. Close the MS Access database. Candidates should be able to: Define Graphics and give examples of Graphic packages (Paint, Harvard Graphics, Photoshop, CoreIDraw, Autocad etc) Explain features of CoreIDraw (LiveSketch Tool, Multi-Monitor, Healing Clone Tools, Copy Curve Segments, Gaussian Blur Feature, Touch-Friendly GU Interface, Powerful Stylus Enhancements, Import Legacy Workspaces, Prominent Interactive Sliders, Custom Node Shapes, Font Filtering and Search, Corel Font Manager, Enhanced Vector Previews, Handles and Node etc.) Use CoreIDraw to design Business Card School Logo National Flag Invitation Card Certificates etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
5.	TOPICS/CONTENTS/NOTES Presentation Package (a) Definition of Presentation package and examples of Presentation packages (b) PowerPoint i. Features of PowerPoint Environment ii. Steps in activating an existing	OBJECTIVES Candidates should be able to: i. Define Presentation and give examples of Presentation packages (MS PowerPoint, Windows Movie Maker, Micromedia Flash, impress, Apple keynotes, etc.) ii. Explain features of PowerPoint Environment (Animation Painter, Video Editor, create a video of you presentation, Automatic Ribbons Toolbars, Transitions, Sections, Cropped Tool, Mask Feature, Effective Preview, Screen Shot, Smart Guides,)
	PowerPoint iii. PowerPoint operations	 iii. Explain steps in activating a PowerPoint presentation iv. Perform PowerPoint operations to: Create new presentation Insert pictures, text, graphs, animated contents, add new slide etc. Save presentation, run slide show, print presentation, close presentation etc.
6.	 Web Design Package (a) Definition and examples of Web Design Packages (b) Uses Web Design Packages 	 Candidates should be able to: i. Define and Give examples of Web design package (HTML, XML, Dreamweaver, Rapidweaver, Google Web Designer, Microsoft Sharepoint Designer, Net Object Fusion, Xara Web Designer etc.)
	(c) Elements of Web design using Dreamview	 ii. List Elements of Web Design Navigation Visual design Content Web friendly Interaction Information Accessibility Intuitiveness Branding Turnaround time Conversion etc.
		 iii. Use Dreamweaver for: Social Media Management Social Media Marketing Website Design & Web Development Pay Per Click (PPC) Management and Advert Consulting etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Concept of Computer Files	Candidates should be able to:
(a) Definitions of basic terms	i. Define some basic terms (File, record, field, data item etc.).
(b) File organisations	ii. Identify and use of basic data types (numeric, alphabetic, and alphanumeric)
(c) Methods of accessing files	iii. Explain the relationship among file structure items (Data item – field - record-file-database)
(d) File classifications	Candidates should be able to:
(e) Criteria for classifying files	 i. Classify files according to how they are organised. (Serial, Sequential, Index and random) ii. Access files as appropriate (Serial, Sequential and Random). iii. Classify files into: Master Transaction Reference iv. Explain the criteria used in classifying files Nature of content (Program and Data) Organization method Storage medium Date Size etc.
2. Handling Computer Files	Candidates should be able to:
(a) Basic operations(b) Data Loss	i. Perform basic file operationsCreate, Delete, Retrieve, Insert, Copy, View, Update, Open, Close etc.
(c) Security(d) Computer versus manual files	 ii. Identify causes of data loss Overwriting Inadvertent deletion Hardware malfunction Virus attack Theft Arson Natural Disaster etc.
	 iii. Use different methods of securing data and maintaining its integrity Backup Antivirus

SECTION D: Managing Computer Files

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 Personal Identification Number Biometrics Passwords Proper labelling of storage devices CCTV Physical Security Fire Extinguisher Smoke Alarms etc.
	v. Compare the advantages and disadvantages of computer and manual file (security, speed of access and creation, cost of setup and maintenance, electricity supply, etc.)

SECTION E: Computer Maintenance and Safety Measures

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Booting and shutting down process	Candidates should be able to:
		 i. Define booting ii. List the two types of booting process (cold and warm booting) iii. Explain the difference between cold and warm booting. iv. Explain the steps involved in booting and shutting down a computer system
2.	Computer Maintenance	Candidates should be able to:
		 i. Perform general cleaning of the computer system ii. Charge and replace battery for portable systems and UPS iii. Clean drive lens iv. Perform simple hardware and software maintenance v. Recover data from a crashed system
3.	Computer Room Management	 Candidates should be able to: Define proper sitting arrangement Position the monitor, keyboard, CPU, Mouse and other peripherals appropriately Ensure Proper illumination of the computer room Maintain a dust free environment Keep liquid away from computer room Keep strictly to laboratory rules and regulations

TOPICS/CONTENTS/NOTES	OBJECTIVES
 Communication Systems (a) Definitions and Acronym of ICT 	Candidates should be able to: i. State the full meaning of the acronym ICT
(b) Types and examples of ICT	 ii. Define ICT iii. List types of ICT. Broadcasting Telecommunication Data Network Information Systems Satellite Communication, etc. iv. Give examples of Broadcasting Radio broadcasting Television Broadcasting Satellites Broadcasting etc. v. List types of Telecommunications Public Switched Telephone Network (PSTN Land Line Mobile phone system Circuit Switched Packet Telephone System (CSPT) Satellite Telephone System Fixed Wireless Telephone System etc, vi. List types of Data Network Personal Area Network (PAN) Local Area Network (LAN) Metropolitan Area Network (MAN) Wide Area Network (WAN) Intranet Internet etc. vii. List types of Information System Global Positioning System (GPS), etc.
2. Application areas of ICT	Candidates should be able to:
(a) Application areas(b) ICT based Devices	 i. Define Applications Areas of ICT: Teleconferencing Video conferencing Telecommuting Telecomputing Messaging Information search, retrieval and archival systems E-Learning Telemedicine E-Commerce E-Government E-Library, etc.

SECTION F: Information & Communication Technology (ICT)

	TOPICS/CONTENTS/NOTES	OBJECTIVES
		 ii. List types of ICT Devices: Mobile phones Computers Automated Teller Machines (ATM) Dispensing Machines Point of Sale Machines Automated Cash Register (ACR) Radio sets Television sets Scanners, etc.
3.	Internet	Candidates should be able to:
	 (a) Definition of terms (b) Internet Browsers (c) Features of Internet Browsers (d) Internet Services 	 i. Define Internet ii. Define and illustrate use of: Home page Browse Browser Chatroom Cybercafe Http Html ISP Webpage Website, etc. iii. Access the Internet through any of the browsers Internet Explorer Opera Firefox Cometbird Ubuntu Google Chrome Phoenix, etc. iv. Explain features of the Internet Browsers Title Bar Menu Bar Tool Bar Address Bar Icons Search Bar Uniform Resource Locator (URL)/Hypertext link, etc. v. Describe the use of different types of Internet services: Electronic Mail (e-mail) E-mail Discussion Group Instant Messaging/Chats Virtual meeting platforms File Transfer Protocol (FTP) World Wide Web (WWW) Search Engines Chatting etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
4.	Electronic Mail	Candidates should be able to:
	(a) Definition	i. Define Electronic Mail and Chattingii. List e-mail services:
	(b) E-mail Service	 Creating e-mail address Composing e-mail
	(c) Steps involved in creating and opening mail (email box, and chatting)	 Sending/receiving e-mail Adding attachments Chatting Creating mailing list/group
	(d) Features of e-mail address	 etc. iii. Explain the features in an e-mail address e.g. xyz@jamb.org.ng (user@Domainname) Explain the components of domain name.
5.	Networking	
	(a) Definitions	Candidates should be able to:
	(a) Definitions	i. Define computer network
	(b) Network types	ii. List and define various types of Networks:PAN
	(c) Network topologies	- LAN - WAN
	(d) Network devices	- MAN - Intranet - Extranet - Internet
		iii. Explain the differences in basic network topologies:Star
		- Bus - Ring
		iv. Define and explain the use of network devices:Hub
		- Modems
		- Switches - Routers
		- Gateway
		- Repeaters
		 Access Points Interface (API) Network Interface Card (NIC), etc.
6.	World Wide Web (www)	Candidates should be able to:
	(a) Definition and full meanings of acronyms	i. Give full meanings of www, HTTP, HTTPS, HTML, XML
	(b) Brief history of WWW	ii. Explain the history behind wwwiii. Explain basic terminologies:www
	(c) Basic terminologies	- Website
	(d) Protocols	WebpageHomepageProtocol etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
(e) Advantages and disadvantages of	iv. Define Protocol and list different types of
www.	protocols (http, https, ftp, etc.)
(f) Navigation through websites	v. List uses and benefits of www.Accessible from anywhere around the globe
(g) Software for web development	with the availability of the Internetaccess to information or make information
(h) Differences between email and website	 accessible to the world connect to people from anywhere from home
	 purchase products online anywhere in the comfort of your home
	- create website for your business and do a lot much more than physical office
	 communicate with anyone around the world through texts, chats, and emails. Online course can be completed using
	 Online course can be completed using www. Online marketing and branding of
	businesses
	 Facilitate establishing professional contacts Unlimited access to information, etc.
	vi. List disadvantages of www - Risk of data and identity theft
	- Cyberbullying
	Easy spread of fake newsHacking
	- Spam mails
	- Paedophile, etc.
	vii. Navigate through websites. - <u>www.jamb.org.ng</u>
	- www.waec.org.ng
	- <u>www.neco.org.ng</u> - <u>www.ui.edu.ng</u>
	- <u>www.jgiyc.com</u>
	- <u>www.google.com</u> , etc.
	viii. Use of software for web development - Frontpage
	- WordPress
	- Dreamweaver - Photoshop
	- Google Web Designer, etc.
	ix. Differentiate between email and website
	<u>xyz@jamb.gov.ng</u>
	and - <u>www.jamb.org.ng</u>
7. Cables and Connectors	Candidates should be able to:
(a) Network cables and connectors	i. Identify different network cables and connectors:

TOPICS/CONTENTS/NOTES	OBJECTIVES
(b) Computer cables and connectors	 Cables (Twisted Pair, Coaxial, Fibre Optics, etc.) Connectors (RJ45, RJ11, T-Connectors ii. Identify different types of Computer Cables and Connectors Cables: Power Cables, Data Cables, Printer Cable, Universal Serial Bus (USB), Monitor Cable, Serial Cable, Parallel Cable, etc. Connectors: Male and Female.

SECTION G: Developing Problem-Solving Skills

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	 Programming Language (PL) (a) Definition and Classification of PL (b) Advantages and disadvantages of different levels of PL 	 Candidates should be able to: i. Define Programming Language (PL) ii. Identify different classifications of PL. Machine Language: interpreted directly in hardware i.e., binary machine code Assembly languages: thin wrappers over a corresponding machine language i.e., Assembly Language/symbolic language. High-Level languages: anything that are machine independent i.e., BASIC, C, Java, Fortran 2008, Python, Pearl etc. iii. Give advantages and disadvantages of Machine Language, Assembly Language.
2.	High Level Languages (HLL)	Candidates should be able to:
	(a) Classifications of HLL(b) Characteristics of HLL(c) Translators	 i. Classify High-Level programming Languages into: Scientific General Purpose Business Object oriented Procedural Artificial Intelligence String processing Domain Specific Scripting Systems Visual Esoteric, etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
		 ii. Explain the characteristics of High Level Programming Languages: Requires translation into machine language Portable Easier to read, write and maintain as commands are similar to English Use data types and data structures, selection statements and repetition/iteration constructs Use logic operators and functions that are built into the language. Programmers friendly Easy to code, debug and maintain iii. Define translators and its two basic types: Interpreters Compilers
3.	 Algorithm and Flowcharts (a) Definitions (b) Functions of Algorithm (c) Properties of Algorithm (d) Flowchart symbols 	 Candidates should be able to: i. Define Algorithm and Flowchart ii. State functions of algorithms: They are used to perform: Calculations Data Processing Automated reasoning etc. iii. State and explain the properties of Algorithm Input specified Output specified Definiteness Effectiveness Finiteness etc. iv. Identify Flowchart symbols Start Input/Output Process Decision Stop Ioop Continuation etc. v. Draw Flowchart of a given programming problem
4.]	Programming Language Structure	Candidates should be able to: i. Identify features/syntax of a programming
((a) Basic Statements	language - Keywords

TOPICS/CONTENTS/NOTES	OBJECTIVES
 (b) Arithmetic/string operators (c) Subunits (d) Primitive and non-primitive data 	 Variable types Constants/literals Numeric String/alphanumeric Basic characteristics of the language ii. Basic statements of a high-level programming language Input Output Processing Comments Subunits (Functions, Procedure, Methods, Subroutines etc.) Statements (Iteration/Loop, Conditional, Assignment, Dimension, etc.) iii. Arithmetic operators and expressions iv. String operators and expressions v. Built in functions vi. Primitive data (Integer, float, Boolean, character, etc.) viii. Complex data structures (Trees, graphs, the function of the structures (Trees, graphs, the structures (Trees, graphs)
5. Program Development	linked lists, objects etc.) Candidates should be able to:
 (a) Definition (b) Characteristics of programs (c) Precautions (d) Steps involved in developing program 	 i. Define a program ii. List characteristics of a good program Accuracy Readability Maintainability Efficiency Generality Clarity clarity etc. iii. State the precautions required in the development of a program Be stable, steady and patient No step skipping Follow order of execution etc. iv. Steps involved in program development Problem analysis Design (Flow charting/ algorithm) development Program coding Program testing/debugging Program documentation Program Maintenance V. Examples of:

	TOPICS/CONTENTS/NOTES	OBJECTIVES
		 Interpreted program (BASIC, java, python) Compiled Program (COBOL, FORTRAN, C, C++, Java etc.)
6.	System Development Life Cycle (SDLC)	Candidates should be able to:
		i. Define SDLC
	(a) Definition of SDCL	ii. Describe SDLC
		iii. Explain stages in SDLC
	(b) Stages of SDLC	 Preliminary study (Identification of the problem, Recognition of the Need) Feasibility Analysis Design Implementation (coding, testing, documentation and delivery) Maintenance Review iv. Draw diagram of a SDLC

SECTION H: Artificial Intelligence (AI) and Robotics

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Definition of AI	Candidates should be able to:
2. Branches of AI	i. Define AIii. Identify branches of AI
3. Applications of AI	 ii. Identify branches of AI Machine Learning (supervised, unsupervised, reinforcement) Neural Network Expert Systems Fuzzy Logic Natural Language Processing Deep Learning etc. iii. List Application Areas of AI Robotics E-Commerce Navigation Human Resource Healthcare Agriculture Gaming Automobiles Social Media Marketing, etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
4. Fundamentals of Robotics	Candidates should be able to:
 (a) Definition of Robotics (b) Main Components of Robotics (c) Types of Robots (d) Application Areas of Robotics (e) Advantages and Disadvantages of Robots 	 i. Define Robotics ii. Define Robots iii. Identify main components of Robots Control system Sensors Actuators Power Supply End Effectors etc. iv. Mention types of Robots Humanoid Robots Autonomous Robots Teleoperated Robots Teleoperated Robots Teleoperated Robots Augmenting Robots Logistics Manufacturing Home Travel Healthcare Space exploration Entertainment Agriculture Food Preparation Manufacturing Military Customer Service etc. vi. State advantages and disadvantages of using Robots

SECTION I: Computer Ethics and Human Issues

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Ethical issues	Candidates should be able to:
a. Computer-related crime	i. Define computer-related crime.ii. State examples of computer-related crime.
b. Responsibility for computer failure	(Compromising computer systems, hacking, theft, etc.)
c. Protection of computer property, records and software	iii. List methods to prevent unauthorised use of computer system (user identification, Passwords etc.)
d. Privacy of the company, workers and customers.	iv. List methods to protect computer resources using both electronic and manual methods.

TOPICS/CONTENTS/NOTES	OBJECTIVES
 Computer Security Cyber risks and protection 	 V. List methods to Protect privacy of individuals (workers, companies, customers, government etc.) by law and electronically. Vi. Define computer security Vii. Identify different types of computer security and their characteristics. Network security Internet security (cyber) Application Security Data security Information security End user security tool to use for the different types of computer security (Firewalls, antivirus software, encryption, etc.) ix. Identify categories of application threats and their characteristics (Input, authorisation, session management, parameter tampering, Identify basic dimensions of Information Security (Confidentiality, Integrity, and Availability (CIA)) xi. Mention Network security Issues (unauthorised, intrusion, rules and configurations that protect confidentiality, integrity and accessibility using both software and hardware.) xii. Mention Network security methods (antivirus software, application security, behavioural analytics, data loss prevention, email security, firewalls, mobile device security, network segmentation, security and event management (SEIM), Virtual Private Network (VPN), Web security, wireless security and event management (SEIM), Virtual Private Network (VPN), Web security, wireless recurity and event management (SEIM, Virtual Private Network (cyber terrorism, malware, virus, trojans, spyware, Ransomware, Adware, Botnets, SQL injection, Phishing, Man-in-the-middle attack, Denial of Service, Dridex, Romance scams, Emotet malware, xiv. List Cyber security safety tips

TOPICS/CONTENTS/NOTES		OBJECTIVES
4. Potentials for Higher Computing	Studies in	Candidates should be able to:
		i. List possible career paths in computing
		- Software Developer
		- Software Test Engineer
		 Programme Analyst
		- System Developer
		- Web Developer
		- Software Development Engineer,
		- Computer System Analyst
		- Database Administrator
		- System Administrator
		- System Engineer
		- System Analyst
		- Network Engineer
		 Business Analyst
		- Program Manager
		- IT Specialist
		- Data Analyst/Scientist
		- AI and Robotics
		 System Security Analyst
		- Digital Forensic Analyst
		 Mobile App Developer
		- ICT Manager
		- Blogger
		- E- Marketer
		- Social Media Manager
		- ICT Educator
		- Career in Academia
		- Private Entrepreneurship
		- Internet Police
		- IT User Support/Desk Officer
		- ICT Librarian
		- Computer Instructor, etc.
